

Learning Content Development

| Mariam Adel

| Merna Sameh

| Learning Objectives

By the end of the session, participants will be able to:

- define instructional design concept.
- understand the ropes and RAR models and its application in designing learning experiences.
- use basic instructional design principles to create a simple effective power point presentation.

 10 Min

What's an unforgettable session
or training experience you have
had, and why?

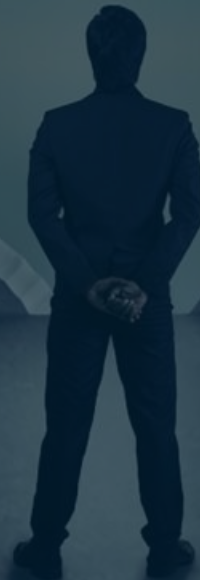

| Instructional Design Concept

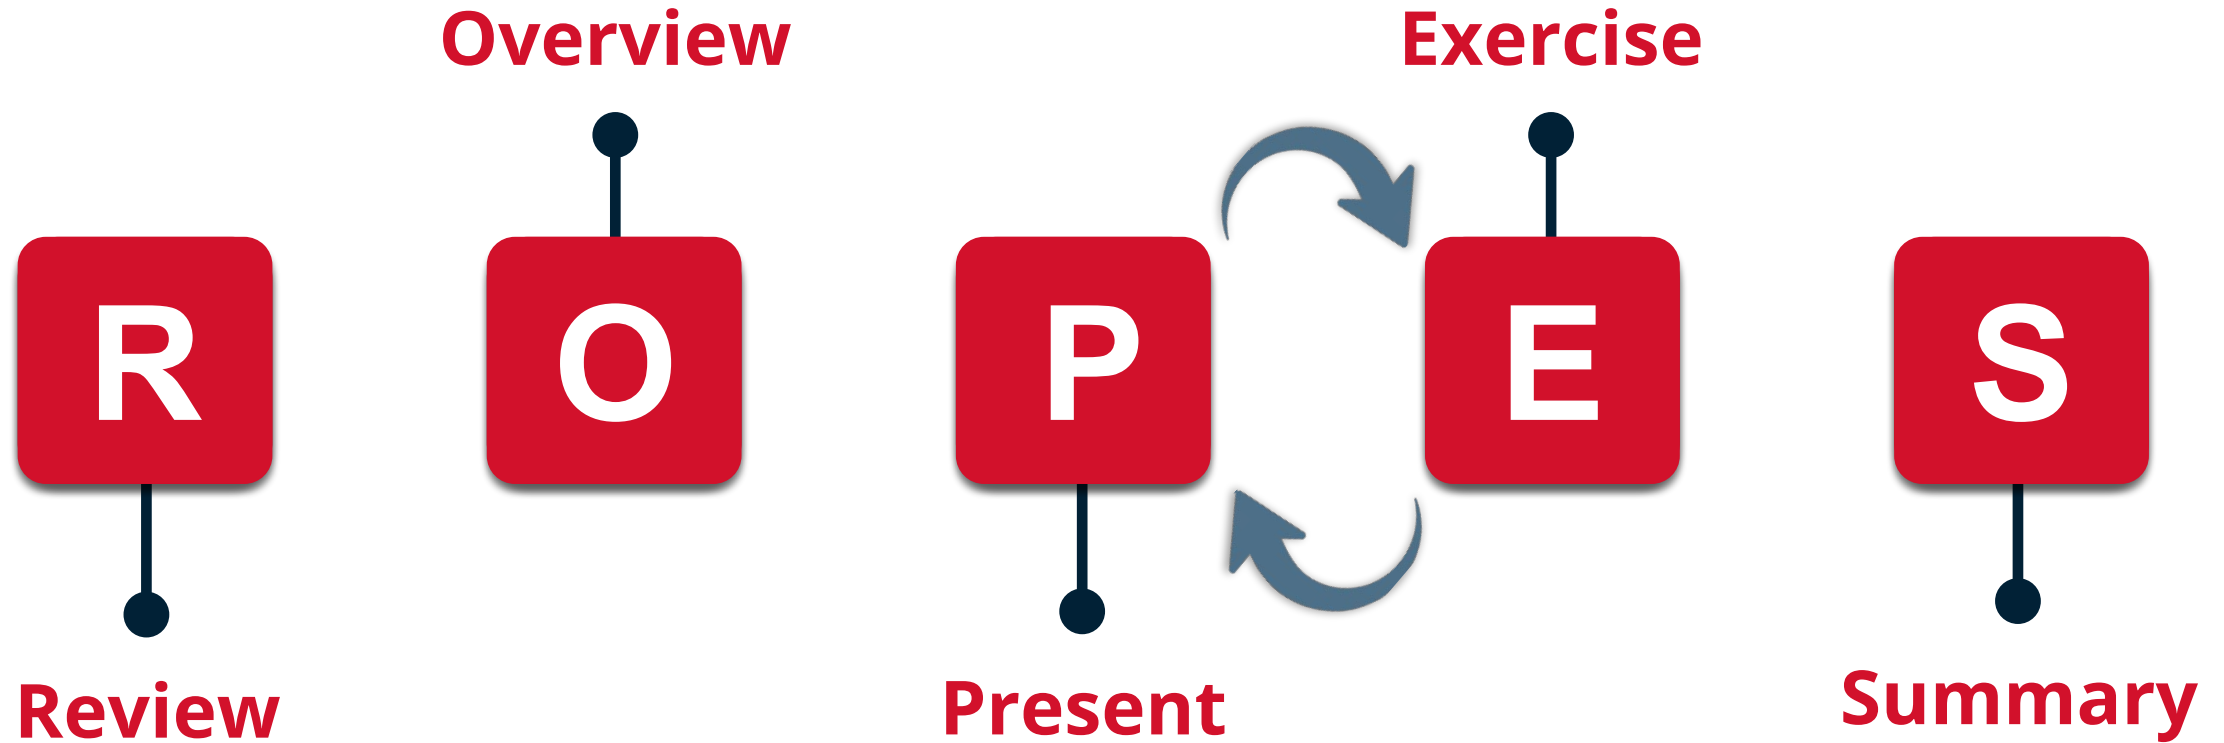

"The systematic process of creating effective, engaging, and measurable learning experiences."

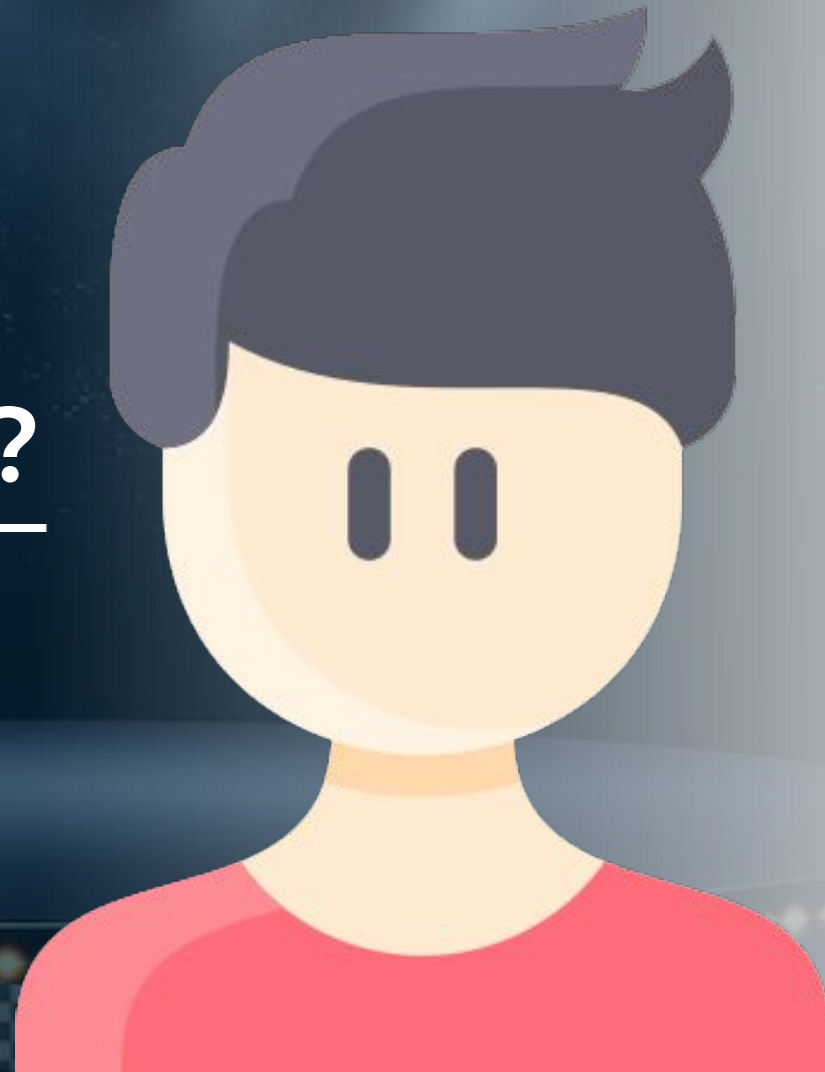

ROPES Model

| ROPES Model

How to make an effective power point?

Why Visual Aids?

- **Enhance Comprehension and Memory:**
Visuals help learners understand & remember information more effectively than purely verbal content.
- **Increase Engagement and Motivation**
Visuals capture attention, stimulate curiosity, and keep learners motivated throughout the session.
- **Types of Visual Aids**
PowerPoint Presentation, Infographics, Flipcharts, Videos & Images

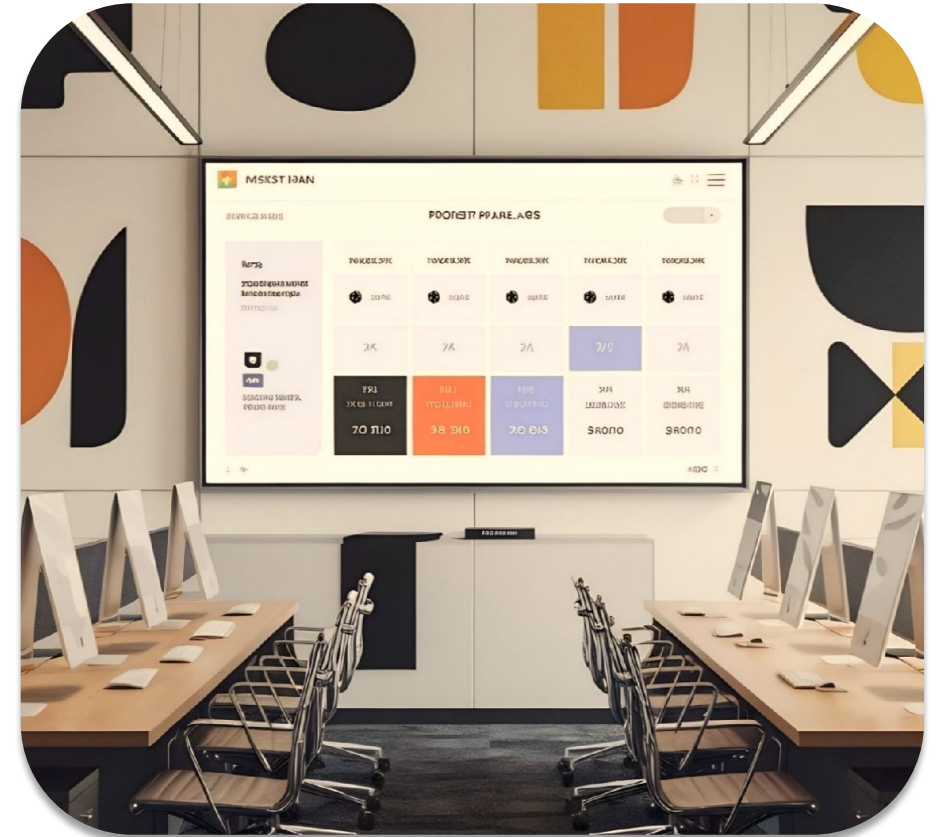

What Goes on a Presentation?

Core Content

- Keep the content minimal with only key words

Guidance & Next Steps

- Activity instructions should be presented clearly on the presentation slide.

ᵀ | Why Visual Design Matter?

- Process information more quickly and efficiently.
- Make connections between different concepts.
- Organize and remember information.
- Stay motivated and engaged.

ᵀ | Visual Design Building Unit (**Layout**)

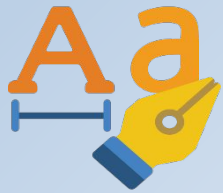

Layout refers to the arrangement of elements on a slide, such as text, images, and graphics

Visual Design Components

Visual Design Elements

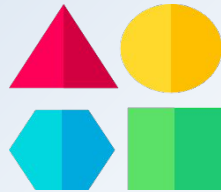

Fonts

Colours

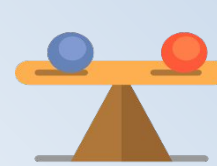

Multi-Media

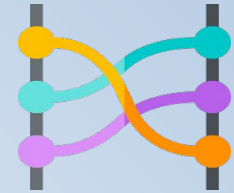

Shapes

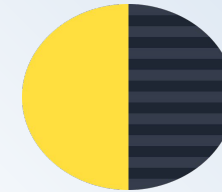

Visual Design Principles

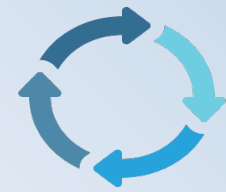

Balance

Visual Relations

Contrast

Consistency

ᵀ | Fonts (**Typography**)

Font Types

Serif

San Serif

Script

Font Weight

Thin

Regular

Black

Font Letter Spacing

Condensed Font

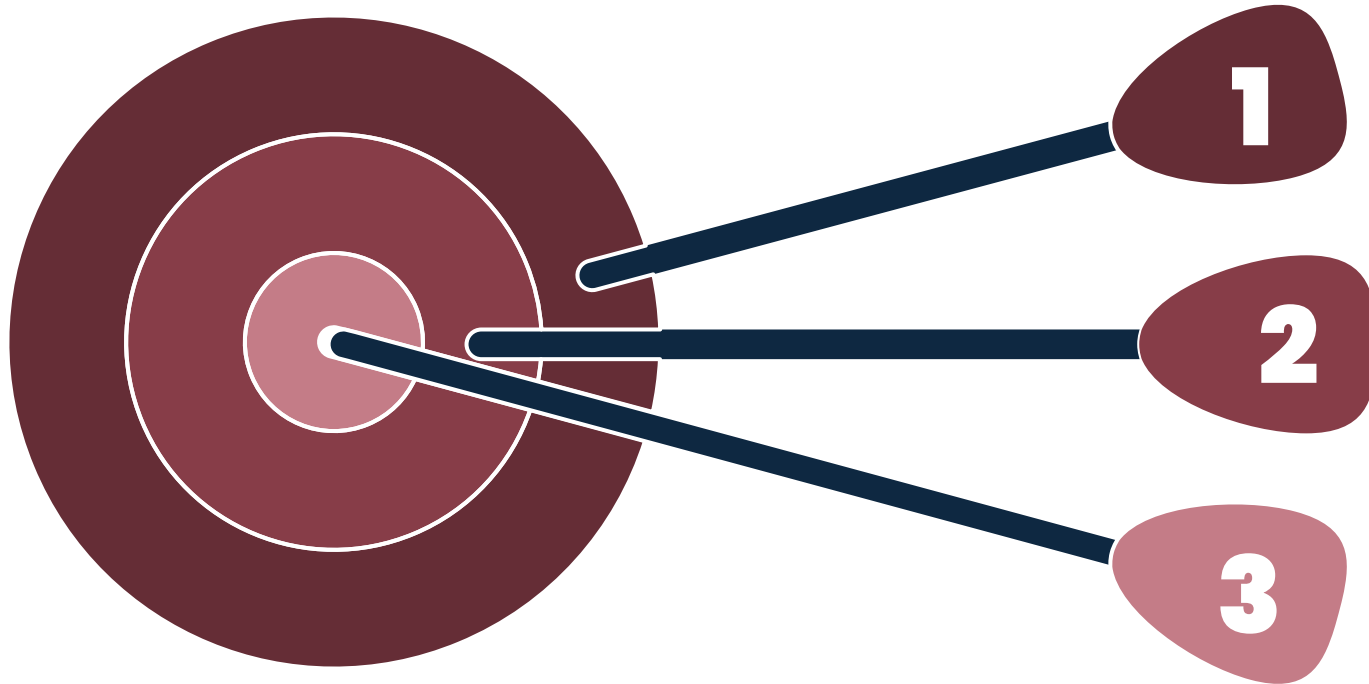

Regular Spacing

Mono Font

epsf

**TRAINING
DEPARTMENT**

Font Hierarchy (Rule of Three)

Heading Font

Most prominent font (weight & size), in case of multiple inline headings adjust weight & size

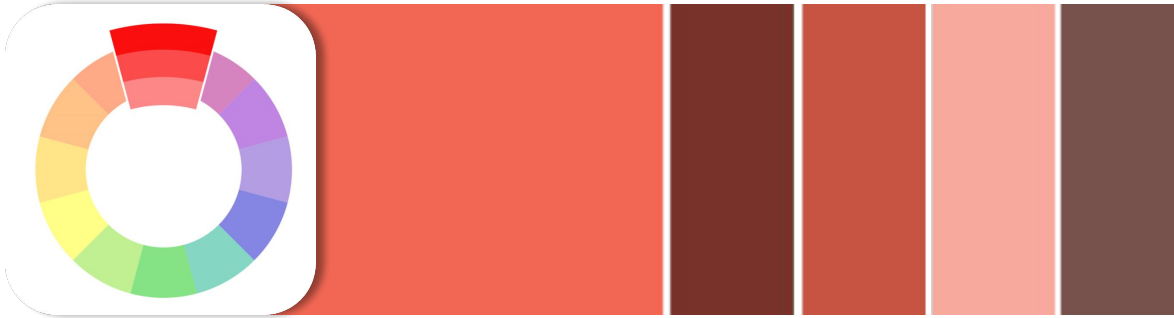

Body Font

A font used for your main body font through presentation. Make sure it's comfortable to read

Decorative Text

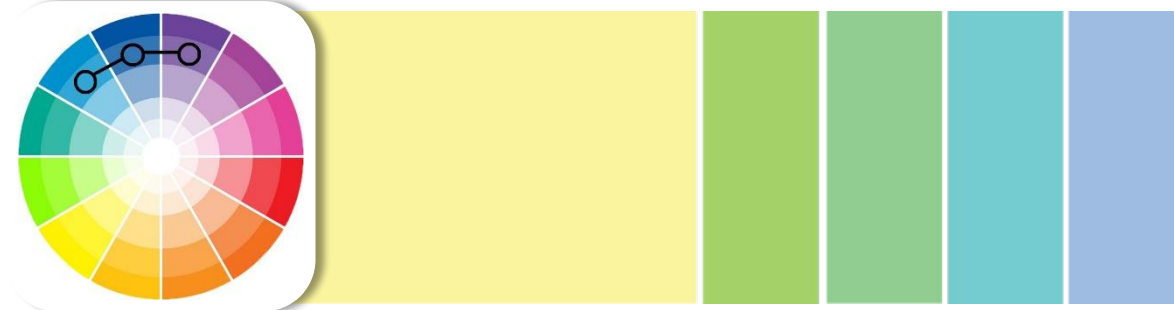

A font used for decorative text such as a quote or tips.

| Colors

Monochromatic

Used for minimalistic look

Analogues

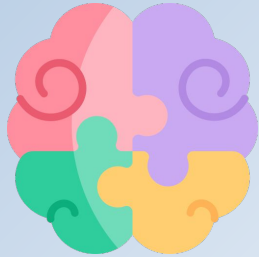

Used for building harmony

Complementary

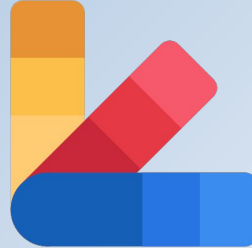

Used for building contrast

₹ | Tips for Colors

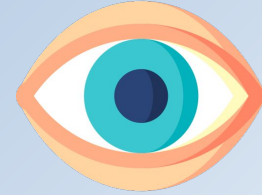

Psychological Aspect

- Consider when choosing colours the psychological state.

Number of Colours

- Use 3-4 colours through your presentation & their shades.
- **Ideal case:**
 - 1 Primary Colour
 - 1 Secondary Colour
 - 1 Accent Colour

Quality of Colours

- Don't choose too bright colours
- Make sure your colours contrasts well

epsf

**TRAINING
DEPARTMENT**

Multi-Media Items

Images, Vectors

- High quality relevant images & Vectors
- Avoid stretching or water-marked images
- Use image to support message not to distract it
- Use descriptive text with images

Videos

- Use high quality relevant videos
- Avoid long videos (3 – 5 mins)
- Don't leave videos without explanation or interpretation

epsf

**TRAINING
DEPARTMENT**

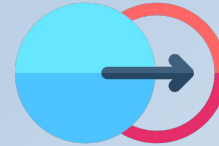

Multi-Media Items

Animation

- Use animation to add interest and clarity to your presentation.
- Avoid using too much animation, as this can be distracting.

Transition

- Use transitions to create a smooth and visually appealing flow between your slides.
- Avoid using too many transitions, as this can be overwhelming for your audience.

epsf

**TRAINING
DEPARTMENT**

Organize

- You can use shapes to create groups of related information, or to highlight important information

Visualize

- Shapes can be used to visually represent information or illustrate relations in content.

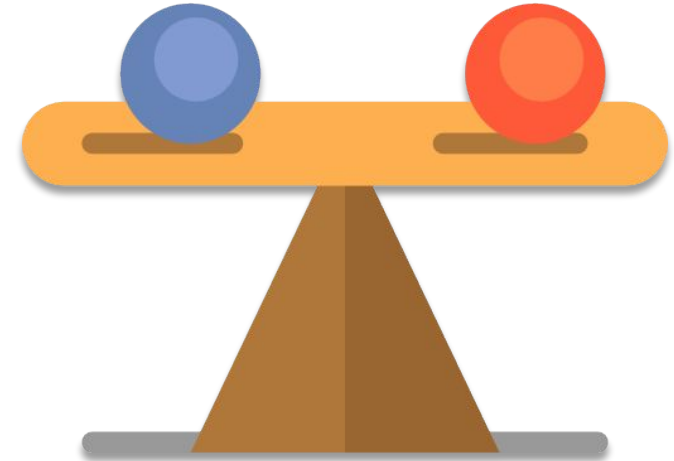

Mood

- Shapes can be used to create a specific mood or tone in your presentation
- Sharp Edges: Urgency
- Soft: Calm & smooth

Balance

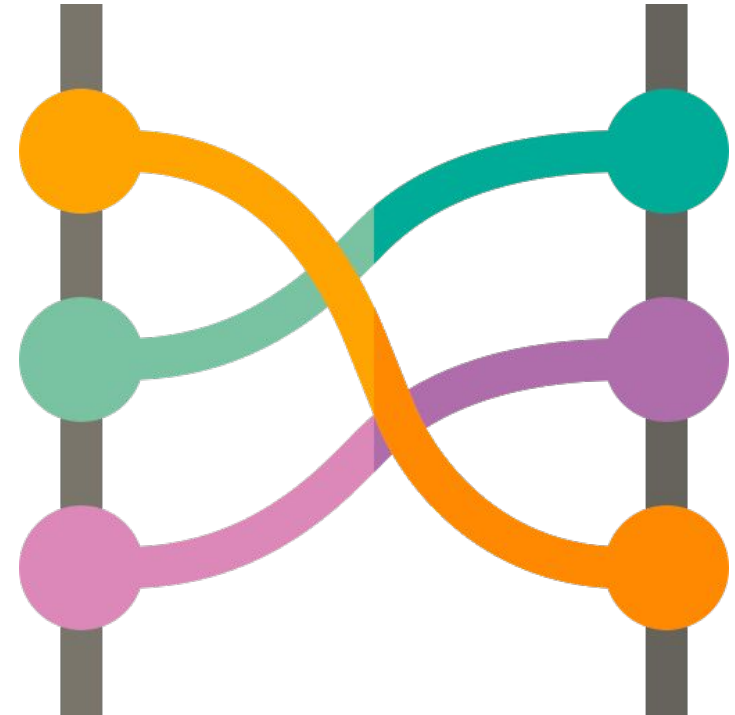

Difference between elements on a slide, such as in size, shape, color, or font weight that can add visual interest and guide the viewer's eye across the slide.

ᵀ | Visual Relation (**Proximity & Alignment**)

To stress the relation between elements, and how they correlate

Example for Proximity

Learning Objectives

By the end of the session, each participant will be able to:

- Identify the working memory role in the process of memorizing & learning.
- Highlight the three different types of cognitive load.
- Identifying design essentials to decrease extraneous cognitive load.
- Comparing between good and bad layout applying design essentials.
