**TRAINING
DEPARTMENT**

Planning and Adaptability

| Trainer Name

| Trainer Name

| Learning Objectives

By the end of this session, participants will be able to:

- Explain the concept of planning
- Distinguish between rational planning and scenario planning.
- Differentiate between adapting and changing a plan
- Apply the OODA Loop to adapt effectively during plan implementation

What is Planning?

Process of setting objectives and determining the best course of action to achieve them.

It involves:

- ✓ Defining a clear vision
- ✓ Aligning it with a mission
- ✓ And translating both into structured steps and strategies.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1

Identifying Goals & Objectives

This step focuses on defining what the plan aims to achieve by **setting clear goals** and **specific objectives** that guide all future actions.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

2

Data Collection & Situation Analysis

This step involves gathering and analyzing information about the **current situation**.

Can be done using **SWOT Analysis**:

S – Strengths

W – Weaknesses

O – Opportunities

T – Threats

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

3

Generating Alternatives

This step focuses on **creating different possible approaches** to achieve the objectives in order to ensure flexibility in planning and avoid limiting the solution to one idea.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

4

Evaluating Alternatives

Each alternative is **analyzed** based on feasibility, resources, and expected impact to determine the most suitable option for implementation.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

5

Selecting the Best Alternative

This step involves **choosing the most effective and realistic option** based on evaluation, ensuring that it aligns with objectives and available resources.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

6

Implementation

This step focuses on turning the selected plan into **actionable steps** by defining roles, tasks, timelines, and workflows.

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

1 Identifying Goals & Objectives

2 Data Collection & Situation Analysis

3 Generating Alternatives

4 Evaluating Alternatives

5 Selecting the Best Alternative

6 Implementation

7 Monitoring & Evaluation

Rational Planning Model

A structured framework that explains how to build an effective plan in a logical and step-by-step way:

7

Monitoring & Evaluation

This step ensures continuous **follow-up** of the plan to track progress, identify issues, and make necessary adjustments to improve performance.

Activity Time

epsf
**TRAINING
DEPARTMENT**

Scenario Planning

A planning approach used to explore different possible future situations and prepare flexible responses for each one.

- ✓ It focuses on understanding multiple **“what could happen”** scenarios in order to reduce uncertainty and improve decision-making.

epsf

**TRAINING
DEPARTMENT**

Scenario Planning

Types of Scenarios:

Best-case scenario

When everything goes better than expected

Worst-case scenario

When major challenges or problems occur

Most likely scenario

The realistic and expected situation

epsf

**TRAINING
DEPARTMENT**

Scenario Planning

How It Works in Planning?

1

Different possible situations are identified

2

Each scenario is analyzed separately to understand its impact on the plan

3

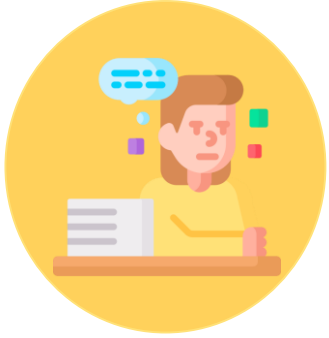

Flexible actions or responses are prepared to deal with each possibility

Activity Time

epsf
**TRAINING
DEPARTMENT**

| Why Plans Fail?

Lack of clear ownership & accountability

No regular follow-up or tracking

Too many priorities without focus

**Lack of resources
(Time, Capacity, Support)**

| Why Plans Fail?

**Weak leadership buy-in or
team engagement**

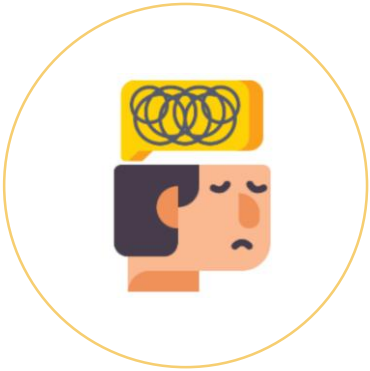

**Plans are not connected
to each other**

**Lack of clear system for
execution**

| Why Leaders Resist Change in Planning

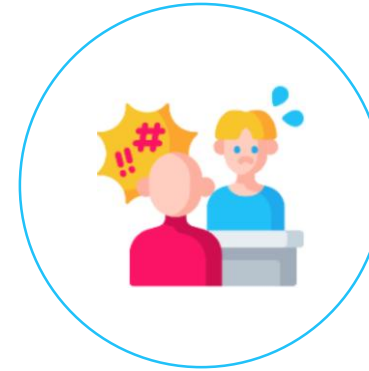

Fear of the Unknown

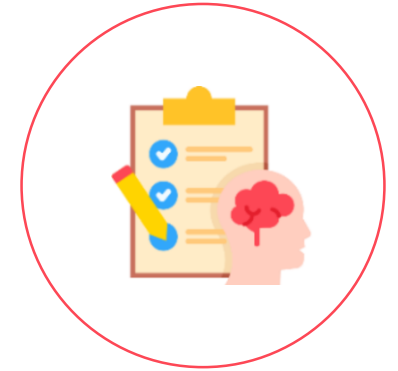

Comfort with Existing Systems

Lack of Confidence in Change Success

Poor Communication

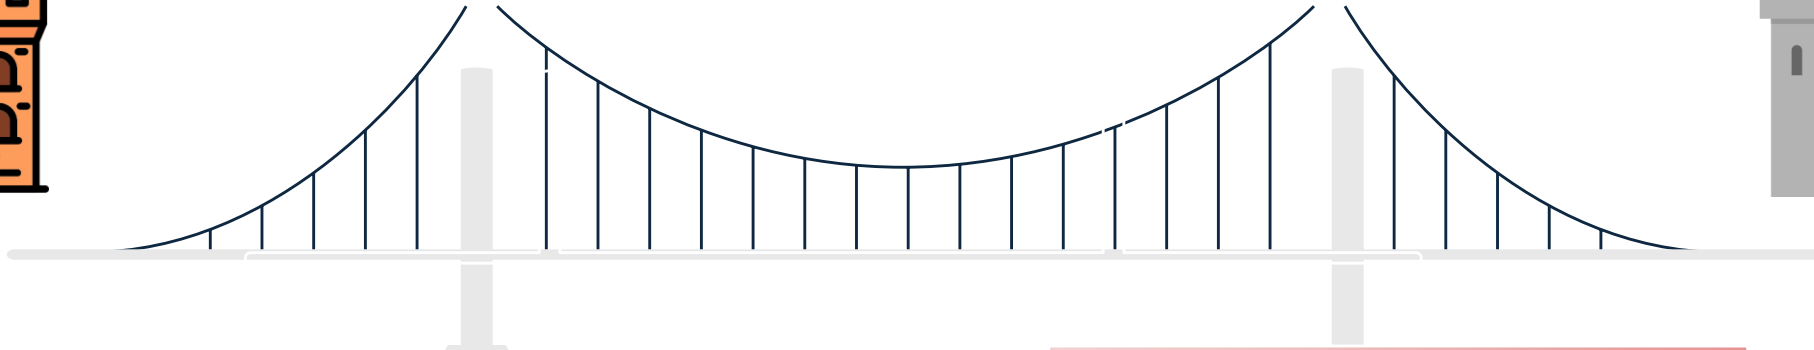

Emotional Attachment to Previous Plans

| Adapting Vs Changing

Adapting

Changing

Castle adjusting
defenses

Castle changing
strategy

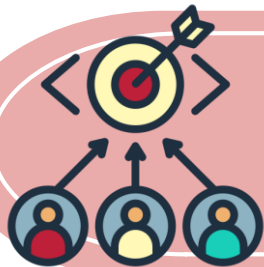

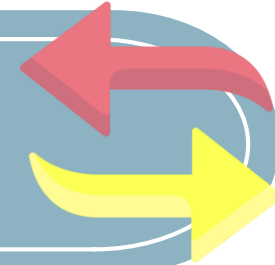

How to Change

Castle Realization

Strategy Shift

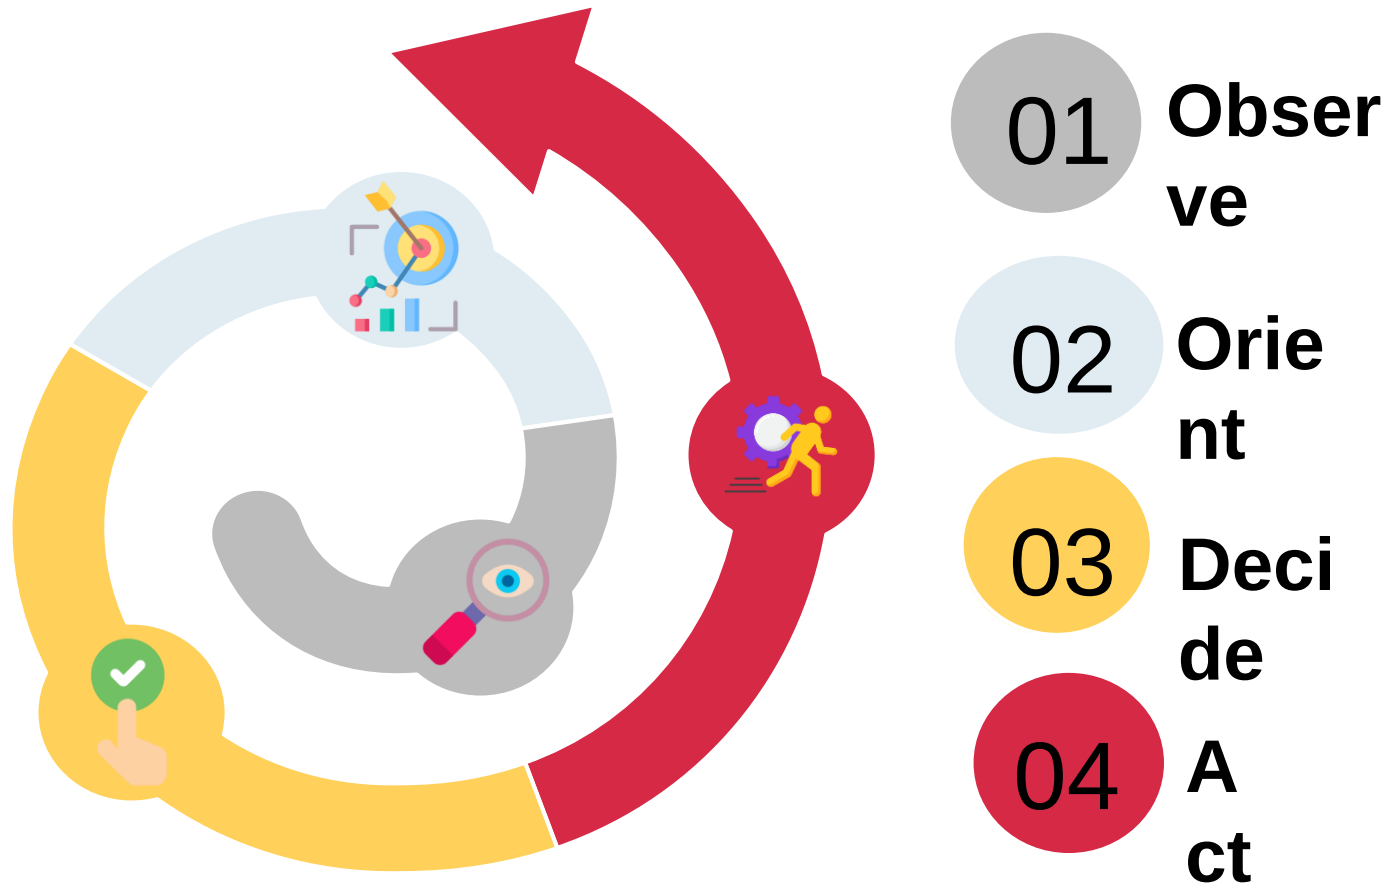

Realign the system
